

INSTRUCTION SHEET

INSTALLATION INSTRUCTIONS

LETTERING PLATE

MAGNETIC AND/OR BOLT-ON ATTACHMENT

1. Clean the backside of the lettering plate and the area on the mold where the lettering plate will be mounted.
2. If using screw-on plate, pre-drill holes in mold at the attachment location using 1/4" drill bit.
3. Mount the lettering plate to the mold.
4. If using screw-on plate, apply a thin bead of high-performance silicone (provided) around the edge of the lettering plate where it meets the mold surface.
5. Wipe off any excess silicone.
6. Allow silicone to dry, per silicone instructions, before applying release agent and/or pouring concrete.
7. Apply release agent to lettering plate and surrounding area.
