HPSFW-6672	66" thru 72"	\$

COMPLETE ASSEMBLY ADJUSTABLE PALLET SUPPORT

Patent Pending

Pictured above is a complete standard assembly of Blackthorn's "ADJUSTABLE PALLET SUPPORT SYSTEM", consisting of one "BASE SUPPORT" and one "HEIGHT POSITIONING SUPPORT" (HPS). All HPSs are compatible with all sizes of Base Supports. The HPS heights listed in the accompanying table are the distances from the floor to the bottom of the pallet.

Both the "standard" Base Support and the "SQUAT - SHORTENED" Base Support have two (2) locator holes, 1" apart. A Standard HPS has four (4) positioning holes, 2" apart. A "SQUAT - SHORTENED" HPS has one (1) positioning hole. These features, working together, allow Blackthorn's "ADJUSTABLE PALLET SUPPORT SYSTEM" to accomplish height adjustment increments of 1".

NOTE: All Flatwall "BASE SUPPORTS" are designed with the largest footprint possible. As the wall thickness gets larger, the accompanying footprint gets larger, reducing or eliminating any possibility of the THAPS System tipping over. The THAPSFWBASE is rated at 15,000 lbs.

OPTIONS

MAGNET = \$

This magnet (1/2" plate) is fixed to the top plate of the "HPS", allowing for safe & easy attachment to the pallet.

ADDITIONAL PIN = \$

SPACER PLATE = \$ (1/8"; 1/4"; 3/8"; 1/2")

Prices Effective: 11/21/06
