

REBAR WHEEL

Spacer for universal use. Clamping tongues on some styles, clamping teeth on other styles for a wide range of bar sizes. Wide contact surface and foot members increase load-carrying capacity and prevent tipping.

PICO WHEEL

Economical round spacer with extra-wide bar support. Minimal formwork contact.

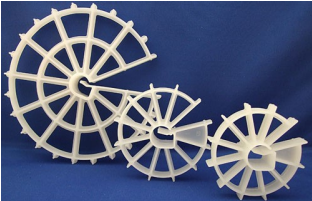

SPAR WHEEL

Inexpensive spacer for use in precast.

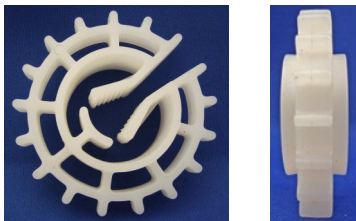

WHEEL SPACER

Minimal formwork contact. Some covers have two styles: "with tab (S)" and "without tab (ST)".

"WIDE-HUB" WHEEL

Rigid spacer with a wide hub and a sturdy base for use in precast.

BARSPAN WHEEL

General purpose circular spacer that accommodates larger range of bar diameters. Heavy duty design easily supports extra loads.

CIR-CLIP WHEEL

For horizontal or vertical reinforcement on precast concrete and most on-site construction applications. Particularly good as side-form spacer in walls and columns.

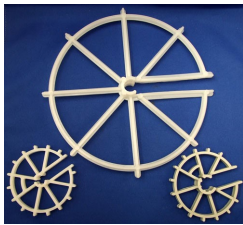

E-Z LOK WHEEL - PLW

Designed for medium and heavy-duty projects. Wide locking hub eliminates "racking". Will not fall off. Industry choice for use in heavy columns. Once locked onto rebar, it will not change shape. It will always provide uniform cover. Side-form spacer. Available in Medium Duty (MD) and Heavy Duty (HD).

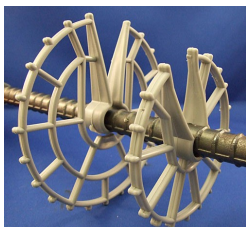

PRECO WHEEL

Suitable for spacing concrete reinforcement in columns, walls, piles, and precast units.

SPACER WHEEL

Light-duty spacer for use in precast.
