### COMPLETE ASSEMBLY of ADJUSTABLE PALLET SUPPORT

Pictured above is a complete standard assembly of Blackthorn's "ADJUSTABLE PALLET SUPPORT SYSTEM". This assembly consists of one "BASE SUPPORT" and one "HEIGHT POSITIONING SUPPORT" (HPS). All HPSs are compatible with Flat Wall and Cylindrical Wall Base Supports. SQUAT/SHORTENED Base Supports are only compatible with HPS-SQUAT Height Supports. The HPS heights listed in the accompanying table are the distances from the floor to the bottom of the pallet.

Both the STANDARD Base Support and the "SQUAT - SHORTENED" Base Support have two (2) locator holes, 1" apart. A Standard HPS has four (4) positioning holes, 2" apart. A "SQUAT - SHORTENED" HPS has one (1) positioning hole. These features, working together, allow Blackthorn's "ADJUSTABLE PALLET SUPPORT SYSTEM" to accomplish height adjustment increments of 1".
